

User Guide

This document will help you effectively navigate through the user interface of your packaged course in order to get the most out of it.

The Package consists of four major sections:

1. Files and folders
2. Main menu
3. Credits page
4. Course Overview

Files and folders

After downloading the `.zip` file from the Packt website, extract the contents of the archive. **You'll find the packaged course, as well as another ZIP archive that contains the code bundle for the course** — a repository of working code samples that you'll find useful while trying out the activities mentioned in the course.

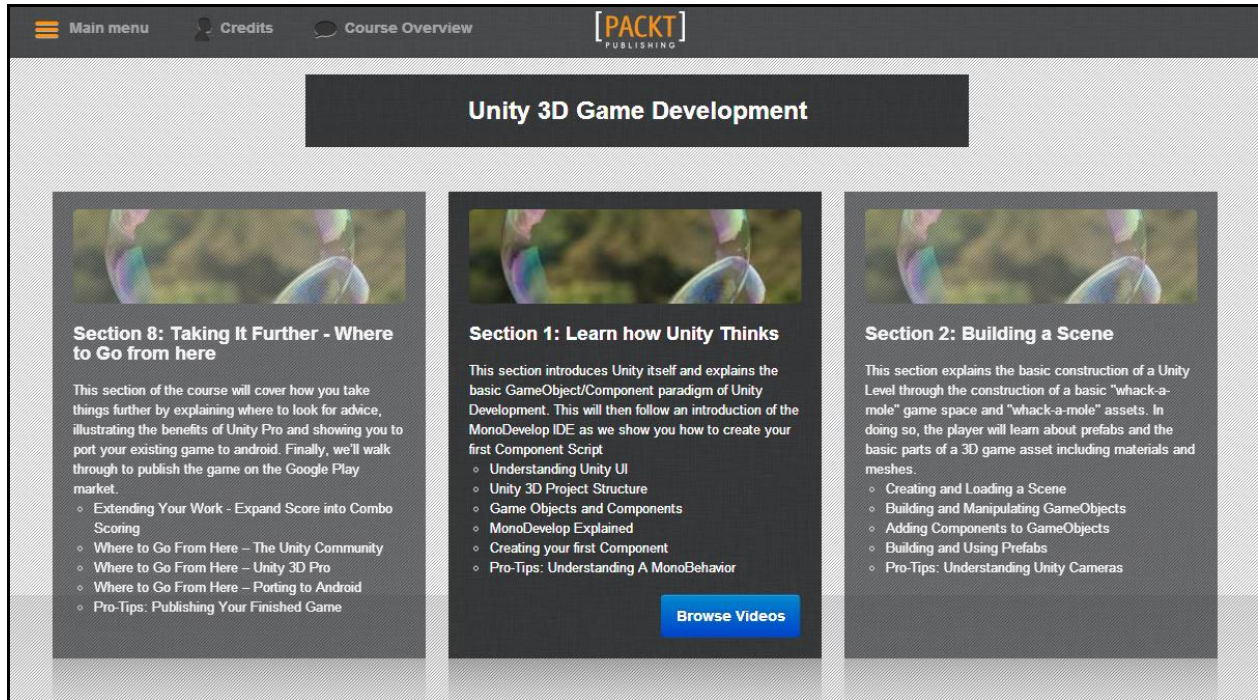

The contents of the extracted archive should look similar to the following screenshot:

Name	Type
images	File Folder
js	File Folder
videos	File Folder
credits.html	Chrome HTML Document
index.html	Chrome HTML Document
javascript.js	JScript Script File
overview.html	Chrome HTML Document
style.css	Cascading Style Sheet Document
video-js.css	Cascading Style Sheet Document

You can access the course's main page through the `index.html` file.

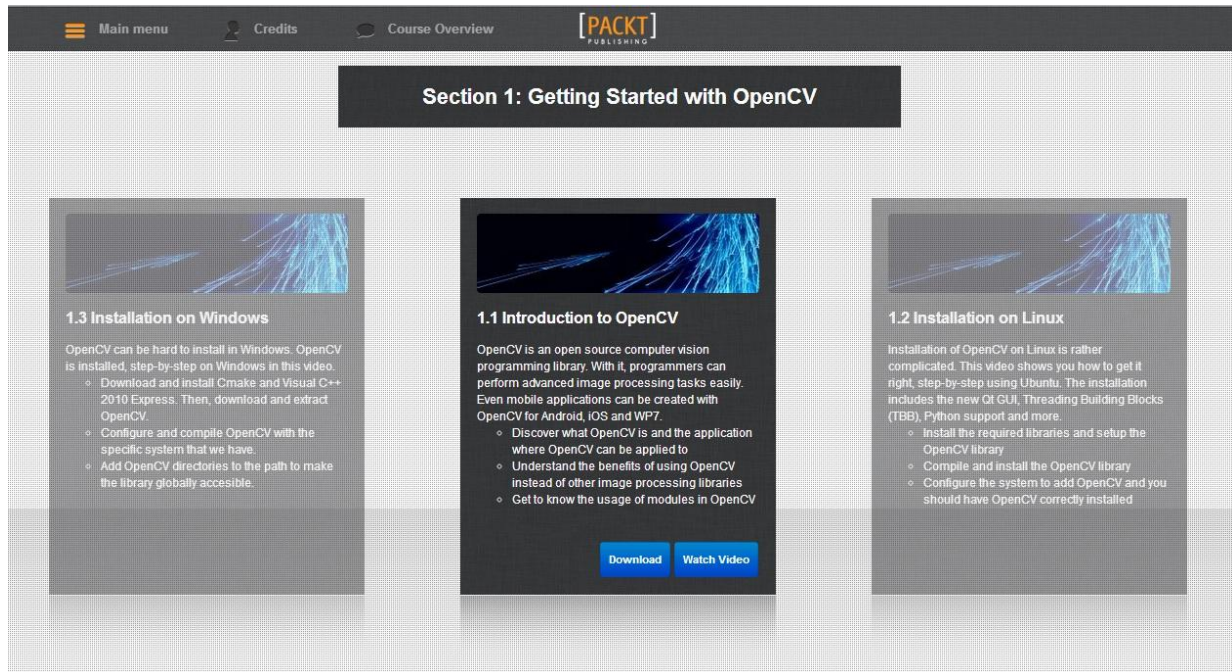

Main menu

Double-click on the [index.html](#) file from the extracted archive. This will open a window in your web browser, similar to the following screenshot:

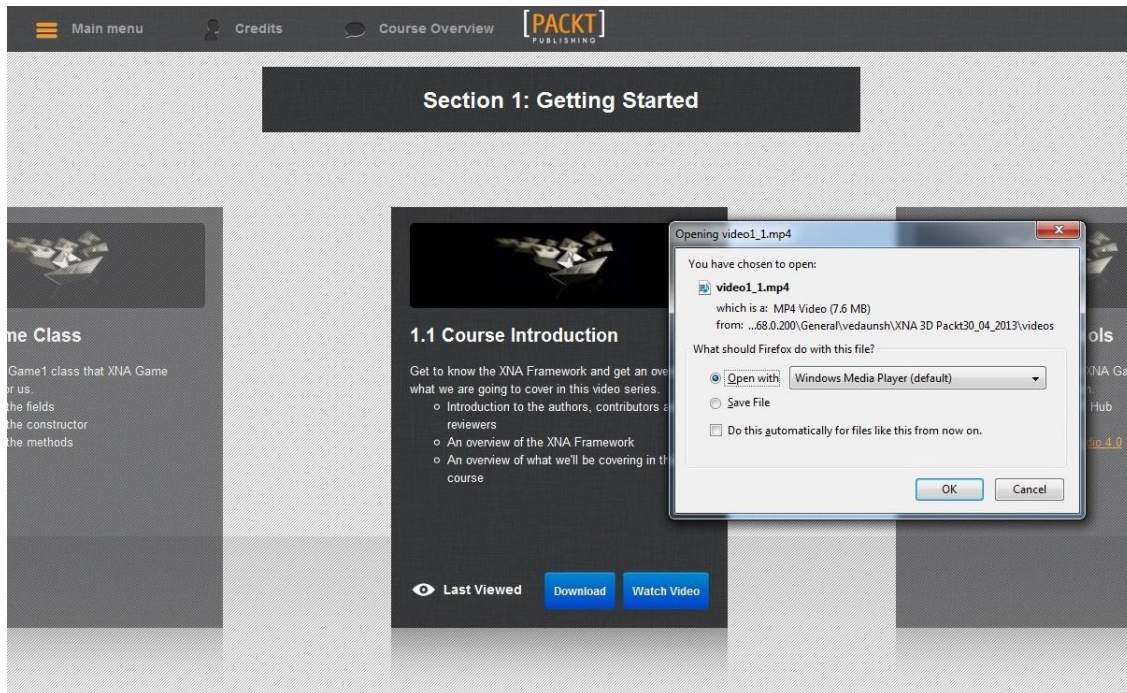

- The **Video Title** is at the top-center of the page (**Unity 3D Game Development**) and the video sections are navigable in the middle.
All the sections are numbered in order from the first to the last section. Each section has a heading along with a brief description, followed by a list of topics covered.
- You can browse through the sections by hovering the mouse pointer and clicking on the **Previous** (◀) or **Next** (▶) navigation arrows on the screen.
- To browse within a particular section, click on the **Browse Videos** tab, present at the bottom right-hand side corner of each section.
Once you're inside a section, you can browse through the subsections.

A course section would appear similar to the following screenshot:

Each section is divided into subsections, and each subsection page comes with a short description of the content covered in its respective video.

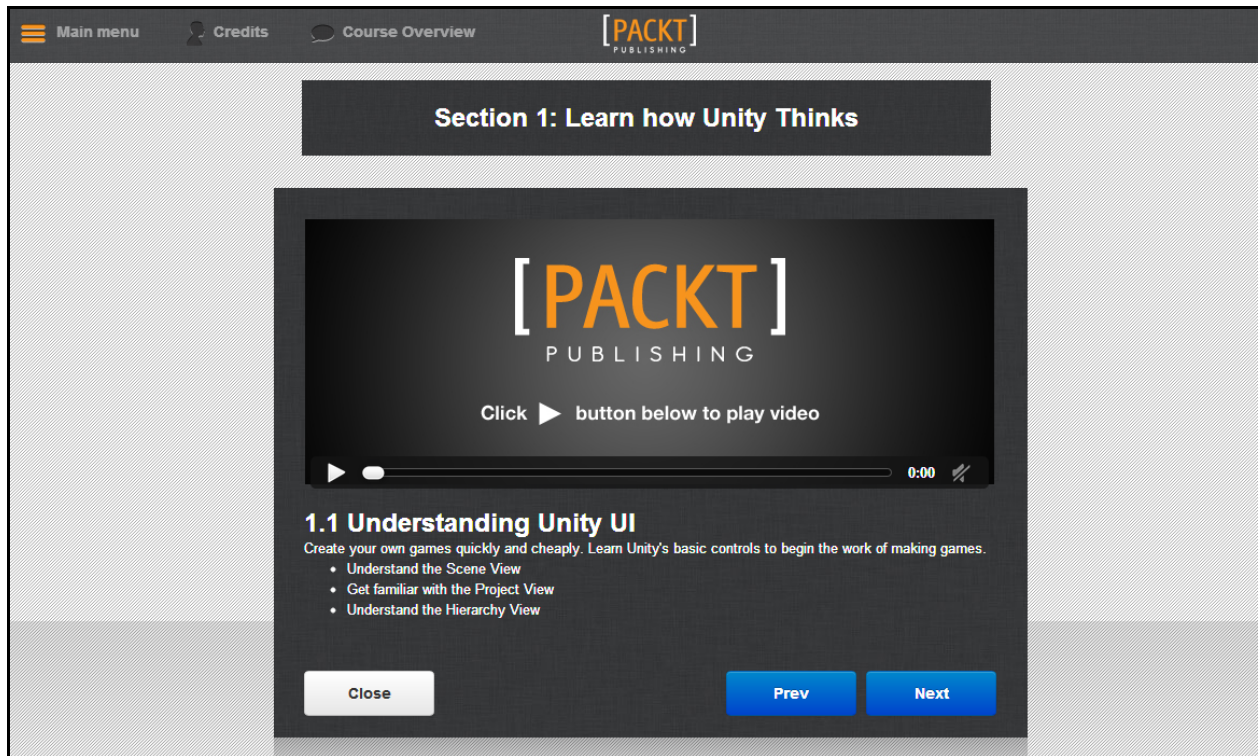

- To go back to the sections page, click on the **Main Menu** tab in the upper-left corner of your page.
- To watch a video, click on the **Watch Video** button, present at the bottom-right corner of each subsection.
- The **Download** button provides the option of playing the video in a media player of your choice, as seen in the following screenshot:

Video Playback Tip:

If your browser does not support video playback in the media player embedded in the package, clicking on the **Download** tab will provide you with the option to play the video in an external media player.

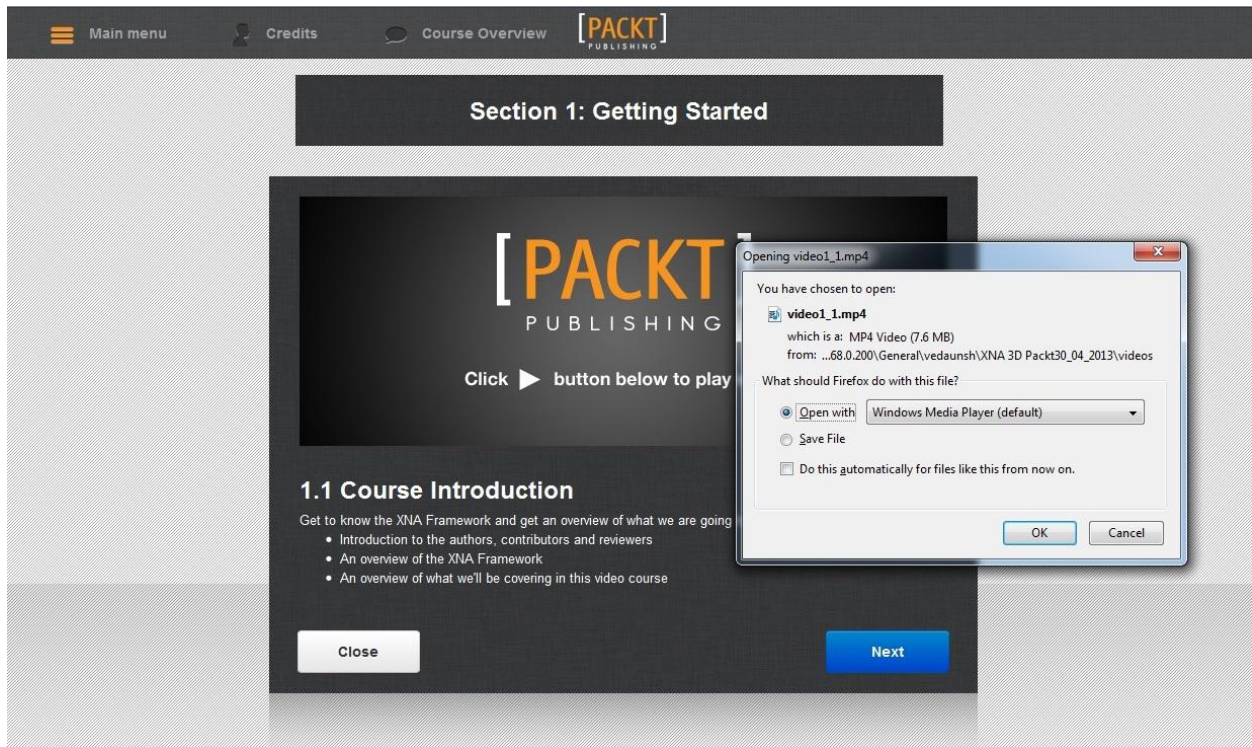

When you click on the **Watch Video** tab, you'll see an embedded video player as seen in the following screenshot:

The contents of this screen are as follows:

- Just beneath the video player is a list of topics covered in the video.
- The **Prev** and **Next** tabs allow you to navigate directly within the subsections of the videos.
- To go back to the subsections page, click on the **Close** button at the bottom left-hand side corner.
- To go back to the sections page, click on the **Main Menu** tab in the upper left-hand side corner of your page.
- You can also navigate to the next chapter from the last video in the section by clicking on the **Next Chapter** button.

If your browser does not support the player embedded in the package, you could click on the image (where the embedded play should have appeared) to open the video in an external media player.

The buttons on the video player perform a set of functions as explained in the following screenshot:

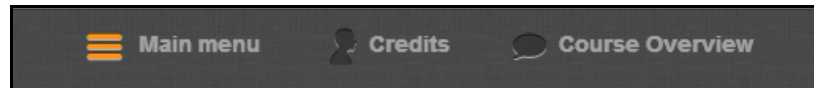

All the functions are self-explanatory.

To exit full screen mode, press the *Esc* key on your keyboard.

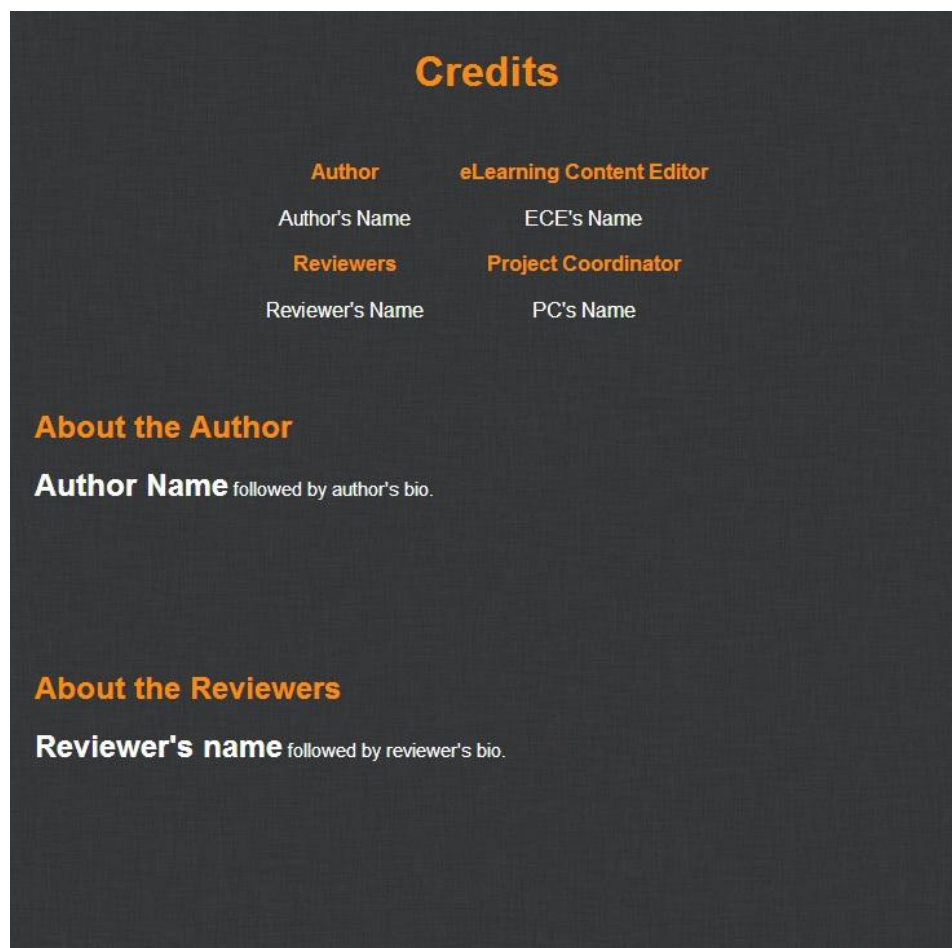

Credits page

The **Credits** tab is on the immediate right-hand side of the **Main menu** tab.

You can directly navigate to this page by clicking on the **credits.html** file from the extracted archive.

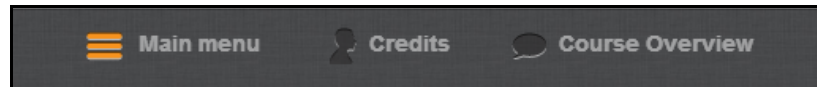

The **Credits** page looks similar to the following screenshot:

This page contains details about the **Author** and the **Reviewer** along with **Acknowledgements**, if any.

Course Overview

The **Course Overview** tab is to the immediate right-hand side of the **Credits** tab.

It contains a **Summary** of the topic, the target audience for the course and what knowledge can be gained from this course, followed by the **Table of Contents**, and the **Copyright** information; as seen in the following screenshot:

Course Name

Course Topic

Course Overview

Who this course is for

Information about Target Audience.

What you will learn from this course

A list of course highlights.

Table of Contents

The course's Table of Contents.
